#### **DETAILED ACTION**

1. Claims 11 and 13-17 are now in the case and remain rejected. Claims 1-10, 12 and 18-19 have been canceled.

### Claim Rejections - 35 USC § 102

- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 3. Claims 11, 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Krohn et al. (U. S. Pat. 4,036,624).

Patent to Krohn et al. teaches a dyeing device (Fig. 1) for dyeing a plastic lens 30 comprising a heating furnace (Fig. 1), a frame section 10 forming a space 14 within the heating furnace (Fig. 1) and a cooling mechanism 20-23 within the heating furnace (Fig. 1) separate from the frame section 10 in a position corresponding to a portion of the lens 30 within the frame section 10 not requiring coloration; a heating section 16 provided within the frame section 10; an openable insertion port for allowing insertion of the lens provided on or near a bottom surface of the frame section 10, a lens-holding mechanism 31 for holding the lens 30; and a lens-moving mechanism 31 for moving the lens-holding mechanism 31 to insert all or a part of the lens 30 from the insertion port into an interior portion of the heating furnace. For claims 13-15, the lens moving mechanism and temperature are controlled (Fig. 2).

Application/Control Number: 10/602,826

Art Unit: 3749

### Claim Rejections - 35 USC § 103

Page 3

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claims 16-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krohn et al. (U. S. Pat. 4,036,624) in view of Kamata et al. (U. S. Pat. 6,520,999).

The dyeing device of Krohn et al. as above includes all that is recited in claims 16-17 except for a vertical movable lens-moving mechanism. Kamata et al. teach a dyeing device with a lens-moving mechanism 11, 12 for moving lens in a vertical direction same as claimed. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute the lens-moving mechanism 11, 12 of Kamata et al. for the lens-moving mechanism 31 of Krohn et al. in order to move lens in a vertical direction.

## Response to Arguments

6. Applicant's arguments filed 2/23/2006 have been fully considered but they are not persuasive to overcome the rejection. First, claims fail to structurally define over the prior art references. Second, the applicant argued that the elements 20-23 are not cooling mechanism in Krohn patent. The examiner disagrees. The bricks 20-23 in Krohn patent do perform the claimed cooling function. Krohn patent does explain that the progressively increased spaced brick arrangement allowing variable flows of air and thus greater cooling through convection and radiation (see Col. 10, lines 61-68). Therefore, the bricks 20-23 constitute cooling mechanism. Third, the applicant also argued that the cooling mechanism or bricks 20-23 are not within the

Art Unit: 3749

heating furnace. However, the examiner has interpreted that the entire system 13 is located in a room (see Fig. 1) which maybe called "a heating furnace".

#### Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jiping Lu whose telephone number is 571 272 4878. The examiner can normally be reached on Monday-Friday, 9:00 AM - 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, EHUD GARTENBERG can be reached on 571 272-4828. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
